

## Spanish Song Project

### Filling in the Missing Words

You'll start with three songs that are already prepped for you. You will listen to them two or three times WITHOUT looking at the screen to copy the words (you are on your honor here!). Fill in what you can. Then, you can watch again to try to fill in the words you missed.

Danza Kuduro—Don Omar

What are the benefits of having the word box? Would you have put in more blanks? Was it boring to wait for the next blank to come along? Where could you have put a few more blanks (what words would you take out)?

A Dios Le Pido—Juanes

How does the pace of this song make a difference? Would a word bank make a difference? Would you offer it the first time through or on a second or third attempt at the song? Would you change any of the words chosen to extract?

Muévete—Kevin Karla y La Banda

Does it make a difference to be familiar with the words in English? Did you notice some “liberties” that were taken in the translation? What do you think the greatest challenges were for the group to create a Spanish version of a popular song?

### If You Were Choosing...

Diamonds—Kevin Karla y La Banda

For this song, I have a typed version of all the lyrics. Think like a teacher! Take a highlighter and choose which words you would take out of the song. Write an explanation of why you think these words make the most sense. Would you provide a word bank? Why or why not? For what level is your version appropriate?

### Time to Prep One Yourself

Now, go to You Tube & find one of these songs to do. (Or you can choose one for yourself.) You will watch the video, type up a complete set of lyrics, copy that typed set & remove words to make it ready to hand to one of my classes.
